LIBRARY.

The College and Society Libraries contain upwards of ten thousand volumes, embracing many rare and valuable works, and accessible to all the Students. The Natural History of New York and the Scientific Library of Prof. Haldeman have recently been added to the Library.

APPARATUS AND CABINETS.

Through the munificence of Hon. C. V. Culver, the College is now in possession of extensive cabinets of Mineralogy and Conchology, and complete Chemical and Philosophical apparatus, of the latest and most approved forms.

Mr. G. B. Delamater has, with noble generosity, donated a Telescope, a Transit, and other astronomical instruments.

The apparatus, for the most part, has been made to order by manufacturers having the highest reputation for skill in their special departments. It comprises several hundred distinct pieces, affording the most ample means of illustrating every branch of physics and chemistry now taught in collegiate institutions.

Among the more expensive instruments are the following:

A compound microscope with accessories, manufactured by Zentmayer, of Philadelphia, at a cost of about $500.

A Rumkorff Induction coil, giving a twelve inch spark, by E. S. Ritchie & Co. of Boston, costing $525.

A Battery of 100 Bunsen's cells.

A Thilorier's apparatus for solidifying carbonic acid.

A very full set of instruments to illustrate the laws of Undulations.

Apparatus for reproducing Tyndall's experiments on Heat.

A solar microscope.

A full set to exhibit the phenomena of Polarized Light.

A spectroscope with four prisms.

Apparatus for projecting optical phenomena upon a screen.

The five sets last named were made by M. Duboscq, of Paris, who is acknowledged to have no superior in the manufacture of optical instruments of that class.

The laboratory is stocked with a full assortment of common chemicals, a cabinet of rare preparations, and an abundant supply of apparatus for all chemical purposes—the greater part of which has been imported from Paris and Berlin, through J. F. Luhme & Co. of New York.

Three distinct collections of minerals and shells have been purchased :

1. The Prescott Cabinet, comprising 2,400 specimens of marine, terrestrial and freshwater shells, and about 3,000 specimens of minerals and fossils collected and mounted by Dr. William Prescott, of Concord, N. H.

2 The Haldeman Cabinet has 550 excellent and carefully labeled specimens of minerals, and about 2,000 species of shells, and was purchased from Prof. S. S. Haldeman, of Columbia, Pa.

3. The Alger Cabinet. This magnificent collection, made by the late Francis Alger, of Boston, was purchased at the price of $12,000, and contains 5,000 specimens of minerals, remarkable for their beauty and variety, many of them unique. There are also a number of duplicates, and a handsome suite of about 1,500 species of shells. This collection is said to have cost Mr. Alger over $35,000.

Arrangements have been made with Prof. Henry A. Ward, of the University of Rochester, for a Lithological and Palæontological cabinet of over 11,000 specimens, including his fine series of casts, 300 of which have been received. The Megatherium Cuvierii and six other huge casts are mounted in the former chapel, which is being fitted up for a Geological Museum.

A skillful Taxidermist is now engaged in preparing the birds of New England, some two hundred of which have already been received.

These valuable additions will greatly increase the scientific advantages of the College and furnish special incentives to the study of Natural Science.

EXPENSES.

Through the liberality of Hon. C. V. Culver, a Boarding Hall has been erected and furnished for the accommodation of one hundred students. For the present, board in the Hall, including room rent, use of furniture care of room, and washing of sheets, pillow-cases and towels, will be four dollars a week, payable in advance.

An incidental fee of two dollars a term will be charged to defray the current expenses of fuel for recitation rooms, services of Janitor, and the ordinary repairs of the College buildings.

NOTE.

Until the present, the Catalogue has been published at the close of the collegiate year. For the future it will be published at the commencement of the college year. Various causes have contributed to prevent its earlier publication.
